INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/000823

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-8	YES
	Claims		NO
Inventive step (IS)	Claims	1-8	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

The application relates to a method for dispensing very small amounts using a dispenser. This device has a fluid chamber and a pulse generator which acts on the fluid chamber.

During a cleaning step, the medium in the fluid chamber is set in vibration and the frequency of the vibrations is varied.

As a result of this variation in frequency, the contaminants are destroyed in a particularly efficient manner.

US2001/0016177 describes a dispensing method as defined in the preamble of claim 1. Said method stipulates, however, that a constant vibration frequency is maintained during the cleaning step.

The same applies to the step involving the cleaning of the pipette tube in DE-A-3614960.

JP-A-2000028623 (English abstract) does not disclose a flushing step.
